X-Plane 11 | Zibo 737-800 | Programming the FMC

A flight management system (FMS) is a fundamental component of a modern airliner's avionics. An FMS is a specialized computer system that automates a wide variety of in-flight tasks, reducing the workload on the flight crew to the point that modern civilian aircraft no longer need flight engineers or navigators. A primary function is in-flight management of the flight plan.
